

# LSEG

We sat down with London Stock Exchange's Talent Acquisition Partner, Tetyana Kryvolap, to discuss working with develop. This is what she has to say.

## LSEG'S CHALLENGES

Founded in 2007 LSEG is one of the leading providers of financial markets infrastructure and data to more than 190 countries serving over 40,000 customers.

With a company wide headcount of over 600, LSEG's technology team makes up almost 20% of this with ambitious growth plans for the future.

One thing we've struggled with when scaling our tech team is finding quality candidates who have practical experience to support what their CV says. We needed to partner with an agency who are specialists, who provide quality candidates, and who are comprehensive in their screening.

## SOLUTIONS

develop consistently presents us with the best talent, and the screening you do isn't like other agencies. They're quick to provide us with quality CV's and we don't waste time interviewing candidates that aren't suitable for the role.

The communication is unmatched to other agencies, they're quick to update us throughout every stage of the process, and the transparency we receive is a massive time saver for us!

## AT A GLANCE

### LSEG'S CHALLENGES

- Finding quality talent
- Time to hire
- Candidate screening

### DEVELOP'S BENEFITS

- Efficient
- Communicative
- Quality over quantity
- Proactive

## WORKING WITH DEVELOP

develop expertly represent our brand, and our job offerings to candidates. They're a recruitment partner who want to find candidates to help us succeed.

They've effectively built out our Python team, and have successfully placed almost 20 people into the business so far spanning the whole of the technology team.

Working with develop is what using an agency should be like.
